Healthy Family Happy Life

Frederick Healthcare LLP

YOU TRUST WE CARE

At **FREDERICK Healthcare LLP**, we recognize the profound impact our actions have on individuals, communities, and the broader world.

With this awareness, we embrace the following core

RESPONSIBILITIES

Patient-Centred Care: We prioritize the well-being and safety of patients above all else. Every decision we make is guided by our commitment to delivering high-quality healthcare products and services that improve lives.

Ethical Conduct and Regulatory Compliance: Integrity is the foundation of our operations. We adhere to the highest standards of ethics and compliance in all aspects of our business, ensuring transparency, honesty, and accountability in every interaction. We are unwavering in our commitment to adhering to all applicable laws, regulations, and industry standards, ensuring the trust and confidence of our customers and partners.

Quality Assurance: Quality is non-negotiable in our pursuit of excellence. We take pride in maintaining the highest standards of quality and safety throughout our operations, from research and development to manufacturing and distribution.

Healthcare Equity: We are committed to promoting healthcare equity and accessibility for all individuals, regardless of socioeconomic status, geography, or background. Through our initiatives and partnerships, we strive to address disparities and improve health outcomes for underserved populations.

Product Safety and Efficacy: Ensuring the safety and efficacy of our pharmaceutical products is paramount. We hold ourselves accountable to rigorous quality standards and regulatory requirements to deliver trusted solutions that improve patient outcomes.

Environmental Stewardship and Sustainability: As stewards of the environment, we recognize the interconnectedness of environmental, social, and economic factors in shaping a sustainable future. We are dedicated to minimizing our environmental footprint, promoting social responsibility, and contributing positively to the communities we serve.

Diversity and Inclusion and Employee Wellbeing: We celebrate the diversity of our workforce and the unique perspectives it brings. By fostering an inclusive culture that values and respects all individuals, we empower our teams to thrive and drive innovation. Our responsibility extends to the well-being and professional development of our employees. We strive to create a supportive, inclusive, and diverse workplace where every individual is valued, empowered, and given opportunities to thrive.

Continuous Learning and Improvement: We embrace a culture of continuous learning and improvement, recognizing that there is always room to grow and evolve. By fostering innovation, embracing new technologies, and learning from both successes and failures, we strive to drive positive change and advance the field of healthcare.

Community Engagement and Impact: We are committed to actively engaging with and supporting the communities where we operate. Through philanthropy, volunteerism, and community engagement initiatives, we aim to make a positive impact on the lives of those around us, supporting health and wellness initiatives and addressing pressing social issues. We also seek to address healthcare disparities, promote wellness, and enhance access to care for all, as we believe in giving back to the communities that support us.

FREDEXIME

CEFIXIME ORAL SUSP.

Used In:

- Upper Respiratory Tract infections
- Lower Respiratory Tract infections
- Skin & Soft Tissue infection
- Gastrointestinal Tract infection

Cefixime is used to treat a wide variety of bacterial infections.

This medication is known as Cephalosporin antibiotic.

It works by stopping the growth of bacteria.

It kills bacteria by preventing them from forming the bacterial protective covering (cell wall) which is needed for them to survive.

PACK: 30 ML
M.R.P.: 54.43/- (EACH BOTTLES)

PACK: 30 ML
M.R.P.: 80.30/- (EACH BOTTLES)

FREDMENTIN

DS, DDS, 625 & 1.25
Amoxicillin & Potassium Clavulanate Tablets

Key Benefits & Action:

Amoxicillin:

A penicillin-class antibiotic that fights bacterial infections by preventing bacterial growth.

Potassium Clavulanate:

A beta-lactamase inhibitor that enhances Amoxicillin's effectiveness by preventing bacterial resistance.

Uses:

Respiratory tract infections
(bronchitis, pneumonia, sinusitis)
Ear, nose, and throat infections
Urinary tract infections (UTIs)
Skin and soft tissue infections
Dental infections
Bone and joint infections

Amoxicillin 1000mg &
Potassium Clavulanate 200mg
PACK: 1.2GM
M.R.P.: 150.00/-

PACK: 30ML

06

FREDOPENEM

200

Faropenem 200mg

Faropenem Sodium is a broad-spectrum beta-lactam antibiotic from the carbapenem class, used to treat bacterial infections caused by susceptible organisms. It is effective against respiratory, urinary, skin, and soft tissue infections.

FREDOPENEM 200 Tablet works by killing bacteria which can cause serious infections. It is used to treat many different types of bacterial infections such as infections of the lungs (pneumonia) and urinary tract. FREDOPENEM 200 Tablet usually makes you feel better very quickly but you should continue taking it as prescribed even when you feel better to make sure that all bacteria are killed and do not become resistant.

Indications:

Respiratory Tract Infections (Bronchitis, Pneumonia, Sinusitis)

Urinary Tract Infections (UTIs)

Skin & Soft Tissue Infections

Gynecological Infections

Ear, Nose & Throat (ENT) Infections

Uses:

Effective against a wide range of bacterial infections

Used for respiratory, urinary, and skin infections

Works against both Gram-positive & Gram-negative bacteria

Well-tolerated with a good safety profile

Side Effects:

Nausea, vomiting, or diarrhea

Abdominal pain or bloating

Headache or dizziness

Allergic reactions (rash, itching, swelling—rare)

PACK: 6 TABLETS
M.R.P.: 649.00/-

Frederick Healthcare LLP

07

FREDZOLID 600

Linezolid tablets Ip 600mg

Key Benefits & Action:

- Broad-spectrum antibiotic effective against Gram-positive bacteria.
- Treats serious infections like pneumonia, skin infections, and resistant bacterial strains.
- Works by inhibiting bacterial protein synthesis, preventing bacterial growth.
- Effective against MRSA & VRE infections.

***"Advanced Protection Against
Tough Bacterial Infections!"***

Indications:

- ✓ Community-acquired & hospital-acquired pneumonia
- ✓ Skin & soft tissue infections
- ✓ Drug-resistant bacterial infections (MRSA, VRE, etc.)
- ✓ Severe bacterial infections unresponsive to other antibiotics

**PACK: 10 TABLETS
M.R.P.: 399.50/-**

08

ITRARICK

ITRACONAZOLE

Mycosis Onychomycosis Candidiasis

- ✓ Broad spectrum for action with efficacy against Candidiasis as well as fungal infection of toe nails & Onychomycosis.
- ✓ A potent fungistatic that is effective even in immuno compromised patients.
- ✓ Itraconazole was tolerated significantly better than conventional AMB & also showed advantage regarding efficacy.
- ✓ It is a useful & safe agent in empirical antifungal therapy

USES :

Itraconazole Capsule is an antifungal medicine. It is used to treat infections in different parts of the body caused by fungi. It works by killing and stopping the growth of fungi. This provides relief from various symptoms caused by the infection and speeds up the healing process. You should keep taking the medicine until you complete the dose even if you get better. This will prevent the infection from returning.

MERORICK

Meropenem:

A broad-spectrum carbapenem antibiotic that works by killing bacteria or stopping their growth.

Tazobactam:

A beta-lactamase inhibitor that prevents bacteria from breaking down meropenem, enhancing its effectiveness.

Uses:

IT'S COMMONLY USED TO TREAT:

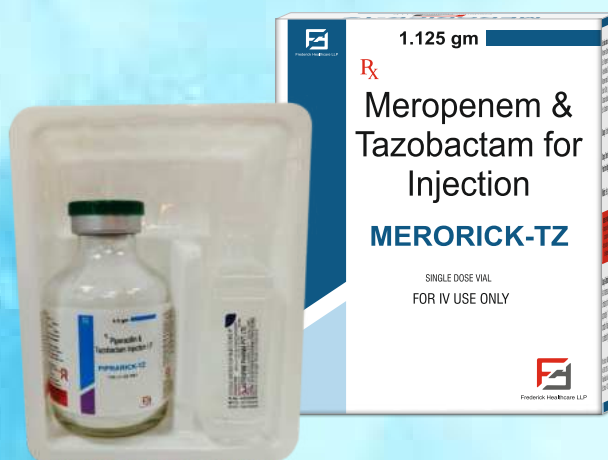

- ✓ Complicated intra-abdominal infections
- ✓ Hospital-acquired pneumonia (HAP)
- ✓ Complicated urinary tract infections (cUTI)
- ✓ Skin and soft tissue infections
- ✓ Bacteremia associated with any of the above infections

10

PIPRARICK-TZ

PIPERACILLIN 4000MG & TAZOBACTAM 500MG INJECTION

Piperacillin:

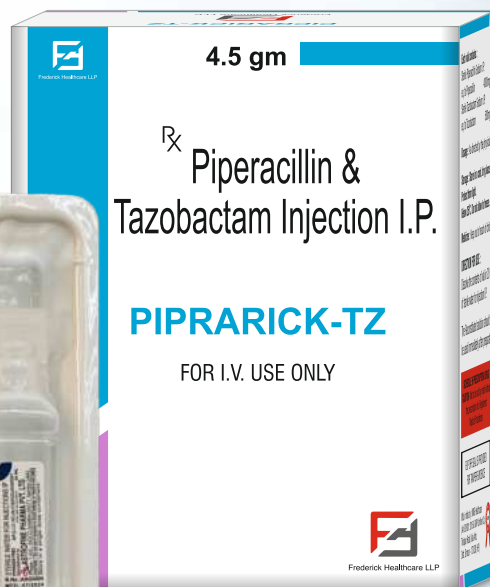

Piperacillin is a semisynthetic penicillin antibiotic used to treat bacterial infections in the lungs, skin, stomach, urinary tract, and other parts of the body. It is often combined with tazobactam to enhance its effectiveness against beta-lactamase-producing bacteria.

Tazobactam:

- β -lactamase inhibitor enhances the effectiveness of piperacillin.
- Demonstrated good activity against *B. fragilis* and *E. coli*.
- Piperacillin-tazobactam is more effective than ceftriaxone + sulbactam in febrile neutropenic patients with hematological malignancies.

INDICATIONS

- Nosocomial Pneumonia • Febrile Neutropenia
- Appendicitis & Peritonitis • Gynecological Infections
- Postpartum Endometritis • Pelvic Inflammatory Disease
- Community-Acquired Pneumonia • Skin & Skin Structure Infections

A better terbinafine To
Terminate Fungal
Infections

11

TERBIRICK-250

Terbinafine HCl 250 mg

Terbinafine HCl is a clinically proven antifungal medication used to fungal infections of the skin and nails.

It works by stopping the growth of fungi, helping restore healthy skin and nails.

Indications

- ✓ Fungal infections of the toenails and fingernails (Onychomycosis)
- ✓ Athlete's foot (Tinea pedis)
- ✓ Jock itch (Tinea cruris)
- ✓ Ringworm (Tinea corporis)

Key Benefits:

- ✓ Clinically Proven Efficacy – Effectively eliminates fungal infections
- ✓ Once-Daily Dose – Convenient and easy to follow
- ✓ Fast Absorption – Targets infection at the source
- ✓ Restores Healthy Skin and Nails

03

EMPAFRED

10 & 25

Type 2 Diabetes Mellitus:

- Empagliflozin helps to lower blood sugar levels by increasing glucose excretion through the urine.

Chronic Kidney Disease (CKD):

- Empagliflozin is used in patients with type 2 diabetes and chronic kidney disease (with moderate to severe kidney impairment).
- It has been shown to slow the progression of kidney damage and reduce the risk of kidney failure.

Heart Failure (HFrEF):

- Empagliflozin is indicated for patients with heart failure with reduced ejection fraction (HFrEF), regardless of the presence of diabetes.
- It helps to reduce the risk of hospitalization for heart failure and cardiovascular death.

Cardiovascular Risk Reduction:

- In patients with established cardiovascular disease (CVD), empagliflozin can lower the risk of heart attack, stroke, and cardiovascular death.

Indications:

Type 2 Diabetes Mellitus:

Cardiovascular risk reduction In diabetic patients

Diabetic kidney disease prevention

Weight management in diabetes

hypertension In diabetic patients

Empagliflozin 10mg

Empagliflozin 25mg

PACK: 10 TABLETS
M.R.P.: 200.00/-

04

EMPAFRED-LN

Empagliflozin helps to lower blood sugar levels by increasing glucose excretion through the urine. It is used in patients with type 2 diabetes and chronic kidney disease (with moderate to severe kidney impairment). It is indicated for patients with heart failure with reduced ejection fraction (HFrEF), regardless of the presence of diabetes.

Linagliptin

- ✓ Linagliptin is used along with diet and exercise to improve blood sugar control in adults with type 2 diabetes
- ✓ Linagliptin is a competitive, reversible DDP-4 (Dipeptidyl peptidase-4) inhibitor. Inhibition of this enzyme shows breakdown of GLP-1 and glucose-dependant insulinotropic polypeptide (GIP). GLP-1 and GIP stimulate the release of insulin from beta cells in the pancreas while inhibiting release of glucagon from pancreatic beta cells. These effects together reduce the breakdown of glycogen in the liver and increase insulin release in response to glucose.

Indications:

Type 2 Diabetes Mellitus:
Cardiovascular risk reduction In diabetic patients
Diabetic kidney disease prevention
Weight management in diabetes
hypertension In diabetic patients

Empagliflozin 25mg & Linagliptin 5mg

EMPAFRED-MET

Empagliflozin

- Empagliflozin helps to lower blood sugar levels by increasing glucose excretion through the urine.
- It is used in patients with type 2 diabetes and chronic kidney disease (with moderate to severe kidney impairment).
- It is indicated for patients with heart failure with reduced ejection fraction (HFrEF), regardless of the presence of diabetes.

Metformin

- Inhibits gluconeogenesis for different mechanisms
- First line agent for treatment of T2DM (Type 2 Diabetes Mellitus)
- Decreases cardiovascular events

BENEFITS OF COMBINATION

- Empagliflozin & Metformin both are anti-diabetic agents that are used in combination to treat diabetes mellitus type-2. In particular, metformin increases the body's sensitivity to insulin.

Empagliflozin 10mg & Metformin 1000mg

PACK: 10 TABLETS

LINARICK-D

Linagliptin 5 Mg & Dapagliflozin 10 Mg Tablets

PACK: 10 TABLETS
M.R.P.: 179.00/-

LINAGLIPTIN

- ✓ Linagliptin is used along with diet and exercise to improve blood sugar control in adults with type 2 diabetes
- ✓ Linagliptin is a competitive, reversible DDP-4 (Dipeptidyl peptidase-4) inhibitor. Inhibition of this enzyme Shows breakdown of GLP-1 and glucose-dependant insulinotropic polypeptide (GIP). GLP-1 and GIP stimulate the release of insulin from beta cells in the pancreas while inhibiting release of glucagone from pancreatic beta cells. These effects together reduce the breakdown of glycogen in the liver and increase insulin release in response to glucose.

DAPAGLIFLOZIN

- ✓ An oral diabetes medicine that helps control blood sugar levels.
 - ✓ Works by helping the kidneys get rid of glucose from bloodstream.
- Lowers the risk of needing to be in hospital for heart failure in adults with type 2 diabetes who also have heart disease.

For Topical Disinfection **FREDIDINE**

2%, 5%, 10% & OZ

Povidone Iodine (5% w/w) + Ornidazole (1% w/w)

This combination medication provides broad-spectrum antimicrobial action.

Povidone Iodine works as an antiseptic, killing bacteria, fungi, and viruses, while Ornidazole effectively targets anaerobic bacteria and protozoa.

Indications

- ✓ Treatment and prevention of wound infections
- ✓ Surgical site disinfection
- ✓ Management of skin and soft tissue infections
- ✓ Vaginal infections caused by bacteria or protozoa

Key Benefits:

- ✓ Broad-Spectrum Action – Fights bacteria, fungi, viruses, and protozoa
- ✓ Fast and Effective – Rapidly reduces microbial load
- ✓ Dual Action Formula – Combines antiseptic and antimicrobial properties
- ✓ Promotes Wound Healing

ATORICK-C

ATORVASTATIN 20MG & CLOPIDOGREL 75MG CAPSULES

Atorick-C Capsule is a combination of two medicines used to prevent heart attack and stroke. This medicine reduces the "bad" cholesterol (LDL) and triglycerides (fats) levels. Moreover, it also decreases the formation of blood clots.

Atorvastatin is used to lower cholesterol if you've been diagnosed with high blood cholesterol and prevent heart disease, including heart attacks and strokes.

Clopidogrel reduces the ability of the platelets to stick together. This reduces the risk of clots forming and protects you from having a stroke or heart attack

PACK: 10 CAPSULES
M.R.P.: 249.00/-

ATORICK-D

ATORVASTATIN 10MG & VITAMIN D3 1000MG TABLETS

Atorick-D Tablet is a medicine used to treat high cholesterol. It is a combination of two medicines that reduces "bad" cholesterol (LDL) and triglycerides (fats) levels in the body. It may also reduce the risk of future heart attack and stroke.

Atorvastatin It is used to lower cholesterol if you've been diagnosed with high blood cholesterol and prevent heart disease, including heart attacks and strokes.

Vitamin D3 is a fat-soluble vitamin that helps your body absorb calcium and phosphorus. Having the right amount of vitamin D, calcium, and phosphorus is important for building and keeping strong bones.

PACK: 10 TABLETS
M.R.P.: 139.00/-

ATORICK-F

ATORVASTATIN 10MG & FENOFIBRATE 160MG TABLETS IP

Atorick F Tablet is a combination of two lipids (fat) lowering medicines. It is used to lower the levels of lipids known as cholesterol and triglycerides in the blood. This medicine helps to reduce the risk of heart disease.

Atorvastatin It is used to lower cholesterol if you've been diagnosed with high blood cholesterol and prevent heart disease, including heart attacks and strokes.

Fenofibrate is used to treat primary hypercholesterolemia, mixed dyslipidemia & severe hypertriglyceridemia.

TORSEMIDE 10MG & SPIRONOLACTONE 50MG

A Unique Combination Of
Diuretic For The Treatment Of Salt
Retention Induced **EDEMA**

TORSEMIDE

- A novel diuretics, shows not only an effective loop action but also a potassium sparing action due to its anti-aldosteronergic effect
- Reduces edema and fluid retention by increasing the urinary output
- Compared with Furosemide, Torsemide has increased bioavailability and a longer half-life
- Showed about a tenfold more potent diuretic action in comparison with furosemide

SPIRONOLACTONE

- It is a potassium sparing diuretics.
- Increases the secretion of water and sodium, while decreasing the excretion of potassium, by competing for the aldosterone sensitive Na^+/K^+ channel in the distal tubule of the nephron.

DERMIRICK CT PLUS

This multi-action formulation is designed to combat bacterial, fungal, and inflammatory skin conditions effectively. Each active ingredient plays a crucial role:

Ciprofloxacin HCL (1.0% w/w):

A broad-spectrum antibiotic that targets bacterial infections.

Metronidazole Benzoate (1.0% w/w):

Effective against anaerobic bacteria and protozoa.

Methyl Paraben (0.16% w/w) & Propyl Paraben (0.033% w/w):

Preservatives to prevent microbial contamination.

Terbinafine HCL (1.0% w/w):

An antifungal agent that treats fungal skin infections.

Clobetasol Propionate (0.05% w/w):

A potent corticosteroid that reduces inflammation, redness, and itching.

KEY BENEFITS:

- ✓ Broad-Spectrum Action – Fights bacteria, fungi, and inflammation
- ✓ Fast-Acting Relief – Quickly reduces redness, swelling, and itching
- ✓ Multi-Targeted Formula – Addresses complex skin infections
- ✓ Preserved for Safety – Ensures product stability and longevity

PACK: 15 GM

*Effective Relief from
Acid-related Disorders*

FREDITAC 150 & 300

Freditac Tablet is a medicine that reduces the amount of acid your stomach makes. It is used to treat and prevent heartburn, indigestion, and other symptoms caused by too much acid in the stomach. It is also used to treat and prevent stomach ulcers, reflux disease, and some rarer conditions.

Key Benefits

- ▶ *Treats Gastroesophageal Reflux Disease (GERD)*
 - ▶ *Heals stomach and intestinal ulcers*
 - ▶ *Reduces heartburn and acid indigestion*
- ▶ *Manages Zollinger-Ellison syndrome (excess stomach acid production)*

***Ranitidine is an H₂ receptor antagonist —
it blocks histamine in the stomach lining,
reducing acid production and relieving symptoms.***

FREDPRIDE

LEVOSULPIRIDE 12.5 MG

- ➡ Levosulpiride is a dopamine D2 receptor antagonist used to enhance gastrointestinal motility.
- ➡ It helps in treating conditions where delayed stomach emptying or gut dysmotility causes discomfort.
- ➡ It is an atypical antipsychotic that acts by decreasing the activity of dopamine in the brain.
- ➡ It is used in the treatment of psychosis, depression, GERD & dyspsia.

Key Benefits:

- Improves Stomach Motility: Enhances movement of food through the stomach and intestines.
- Reduces Acid Reflux: Helps control GERD by speeding up gastric emptying.
- Alleviates Bloating & Fullness: Effective in reducing post-meal discomfort.
- Anti-Nausea Action: Prevents nausea and vomiting by blocking dopamine receptors in the brain.

INDICATIONS:

- ✓ Functional Dyspepsia (indigestion)
- ✓ Gastroesophageal Reflux Disease (GERD)
- ✓ Diabetic Gastroparesis (delayed stomach emptying)
- ✓ Nausea & Vomiting Irritable Bowel Syndrome (IBS)

10

HEPARICK-L INJECTION

L-Ornithine L-Aspartate is a combination of two amino acids: L-Ornithine and L-Aspartate. It is commonly used in medical treatments, especially for liver-related conditions.

Product Highlights

- Liver Health and Detoxification
- Support in Cirrhosis and Chronic Liver Disease:
- Ammonia Detoxification
- Enhancement of Protein Synthesis
- Prevention of Hepatic Encephalopathy (HE) Recurrence
- Improving Liver Regeneration

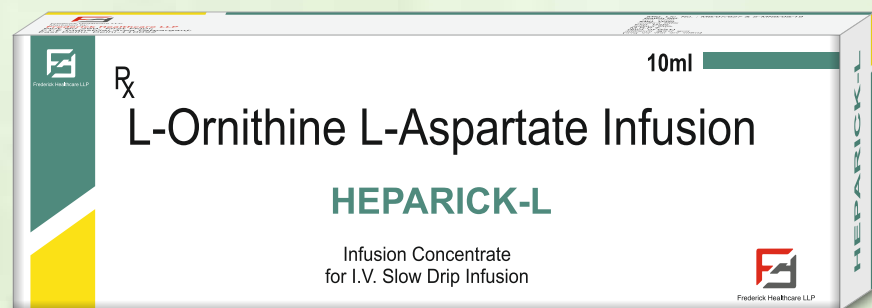

Uses

L-Ornithine L-Aspartate is most commonly used in patients with liver diseases, particularly in cases of hepatic encephalopathy (a condition caused by severe liver dysfunction, where toxins like ammonia build up in the brain and impair mental functioning). In chronic liver diseases like cirrhosis, where the liver's ability to detoxify the body is compromised, L-Ornithine L-Aspartate can be used as a supportive therapy.

OFLORICK-MS

Key Benefits & Uses

Ofloxacin:

A fluoroquinolone antibiotic that treats bacterial infections in the stomach and intestines.

Metronidazole Benzoate:

An antiprotozoal and antibacterial agent effective against amoebiasis, giardiasis, and H. pylori infections.

Simethicone:

A defoaming agent that relieves gas, bloating, and abdominal discomfort by breaking down gas bubbles in the stomach.

Indications:

Diarrhea & Dysentery caused by bacterial & protozoal infections.

Gastrointestinal infections
(Amoebiasis, Giardiasis).

Helicobacter pylori-related gastritis.

Flatulence, bloating, and indigestion.

Oflorick-MS Suspension is an antibiotic that helps treat bacterial infections. It is used in treating infections of the urinary tract, nose, throat, skin and soft tissues, and lungs (pneumonia). It cures the infection by stopping the further growth of the causative bacteria.

Side Effects:

Nausea, vomiting, or metallic taste.

Diarrhea or constipation.

Dizziness or headache.

Abdominal discomfort.

Allergic reactions

(rash, itching, swelling - rare).

Effective Relief from **18** Acidity, Reflux & Nausea

PANTARICK

Pantoprazole Sodium IP 40mg:

A proton pump inhibitor (PPI) that reduces stomach acid production, treating acid reflux, GERD, and ulcers.

Domperidone IP 30mg:

A prokinetic agent that enhances stomach motility, preventing nausea, vomiting, and bloating.

INDICATIONS:

- ✓ Gastroesophageal Reflux Disease (GERD)
- ✓ Acid Reflux & Heartburn
- ✓ Nausea & Vomiting
- ✓ Dyspepsia (Indigestion)
- ✓ Bloating & Gastric Discomfort

Key Benefits:

Dual Action Formula:

Pantoprazole: Reduces acid production for lasting relief.

Domperidone: Prevents regurgitation, controls nausea, and aids digestion.

24-Hour Acid Control: Long-lasting protection from acidity.

Promotes Stomach Emptying: Relieves bloating and fullness.

Fast Symptom Relief: Soothes heartburn and gastric discomfort.

*Prokinetic Agent for
Gastrointestinal Disorders*

FREDPRIDE

LEVOSULPIRIDE 12.5 MG

- ➡ Levosulpiride is a dopamine D2 receptor antagonist used to enhance gastrointestinal motility.
- ➡ It helps in treating conditions where delayed stomach emptying or gut dysmotility causes discomfort.
- ➡ It is an atypical antipsychotic that acts by decreasing the activity of dopamine in the brain.
- ➡ It is used in the treatment of psychosis, depression, GERD & dyspepsia.

Key Benefits:

- Improves Stomach Motility: Enhances movement of food through the stomach and intestines.
- Reduces Acid Reflux: Helps control GERD by speeding up gastric emptying.
- Alleviates Bloating & Fullness: Effective in reducing post-meal discomfort.
- Anti-Nausea Action: Prevents nausea and vomiting by blocking dopamine receptors in the brain.

INDICATIONS:

- ✓ Functional Dyspepsia (indigestion)
- ✓ Gastroesophageal Reflux Disease (GERD)
- ✓ Diabetic Gastroparesis (delayed stomach emptying)
- ✓ Nausea & Vomiting Irritable Bowel Syndrome (IBS)

BURNING NEUROPATHY PAIN

A DISCOMFORT THAT DEMANDS RELIEF

*Powerful Combination for
Neuropathic Pain Relief*

GABARICK NT-400

GABAPENTIN IP 400 MG
NORTRIPTYLINE 10 MG

Gabapentin 400mg: An anticonvulsant that calms nerve activity by altering the way the brain processes pain signals, effectively treating neuropathic pain.

Nortriptyline 10mg: A tricyclic antidepressant (TCA) that boosts serotonin and norepinephrine levels, enhancing pain relief and managing mood disorders.

INDICATIONS:

- ✓ Neuropathic Pain (due to diabetes, shingles, or spinal cord injury)
- ✓ Diabetic Peripheral Neuropathy
- ✓ Postherpetic Neuralgia (nerve pain after shingles)
- ✓ Fibromyalgia
- ✓ Chronic Pain Syndromes

Key Benefits:

Dual Mechanism of Action:

- Gabapentin reduces abnormal nerve activity.
- Nortriptyline enhances pain modulation and boosts mood.
- Improved Sleep: Eases nerve pain and promotes better sleep.
- Mood Stabilization: Helpful for patients with both chronic pain and depression.
- Long-Lasting Relief: Provides sustained pain control and reduces burning or tingling sensations.

PACK: 15 TABLETS

M.R.P.: 249.00/-

PREGARICK 300, M, MNT & NTP

PREGABALIN:

Class: Anticonvulsant, Neuropathic pain agent

Mechanism of Action: Binds to the $\alpha 2-\delta$ subunit of voltage-gated calcium channels in the central nervous system, reducing the release of excitatory neurotransmitters, thereby decreasing nerve pain and seizures.

Indications: Neuropathic pain, Fibromyalgia, Epilepsy, Generalized anxiety disorder (GAD)

Common Side Effects: Dizziness, drowsiness, dry mouth, weight gain, blurred vision

Precautions: Use cautiously in renal impairment; may cause withdrawal symptoms if stopped abruptly.

METHYLCOBALAMIN:

Class: Vitamin B12 analog (Neurotropic vitamin)

Mechanism of Action: An active form of Vitamin B12 that plays a crucial role in nerve function, promoting myelin sheath formation and nerve regeneration.

It helps reduce nerve damage by enhancing protein synthesis and repairing injured nerve cells.

Indications: Peripheral neuropathy, Diabetic neuropathy, Megaloblastic anemia, Vitamin B12 deficiency

Common Side Effects: Nausea, headache, diarrhea, rash (rare)

Precautions: Use cautiously in patients with Leber's disease (hereditary optic neuropathy); monitor for allergic reactions.

NORTRIPTYLINE:

Class: Tricyclic Antidepressant (TCA)

Mechanism of Action: Blocks the reuptake of norepinephrine and serotonin in nerve endings, increasing their levels in the central nervous system. This helps regulate pain signals and improve mood.

Indications: Neuropathic pain, Depression, Migraine prophylaxis, Fibromyalgia

Common Side Effects: Dry mouth, Dizziness, Constipation, Drowsiness, Weight gain

Precautions: Use cautiously in patients with heart disease, glaucoma, or seizure disorders
Gradual dose reduction is recommended to avoid withdrawal symptoms
May cause drowsiness — avoid alcohol and activities requiring alertness

EYE DROPS

01

OPHTHALMIC

Bepotastine 10.7mg Benzalkonium chloride solution 0.01%v/v

- ✓ Bepotastine (10.7 mg) – A second-generation antihistamine that blocks histamine (H1 receptor) to reduce eye itching, redness, and swelling caused by allergies.
- ✓ Benzalkonium Chloride (0.01% v/v) – A preservative that prevents microbial contamination but may cause mild irritation in sensitive individuals.

Uses:

- ✓ Allergic conjunctivitis – Relieves itching, redness, and irritation.
- ✓ Seasonal allergies – Helps prevent eye discomfort due to allergens like pollen, dust, or pet dander.
- ✓ Fast-acting & long-lasting relief – Works quickly with minimal side effects.

PACK: 5 ML
M.R.P.: 275.00/-

Polyethylene Glycol 400 USNF 0.4% w/v, Propylene Glycol IP 0.3% w/v, Stabilized Oxychloro Complex 0.005% w/v

- ✓ Polyethylene Glycol 400 (0.4%) – Provides long-lasting moisture.
- ✓ Propylene Glycol (0.3%) – Forms a protective moisture layer.
- ✓ Stabilized Oxychloro Complex (0.005%) – A mild preservative that prevents contamination without causing irritation, offering gentle antimicrobial protection.

Uses:

- ✓ Relieves dry eyes & irritation
- ✓ Soothes discomfort from screen use, wind, or air conditioning
- ✓ Gentle & safe for sensitive eyes

PACK: 10 ML
M.R.P.: 295.00/-

Nepafenac 0.1 % W/v Stabilized Oxychloro Complex 0.01% W/v

- ✓ Nepafenac (0.1% w/v) – A NSAID (non-steroidal anti-inflammatory drug) that reduces pain, swelling, and inflammation by inhibiting prostaglandins.
- ✓ Stabilized Oxychloro Complex (0.01% w/v) – A gentle preservative that prevents microbial contamination while minimizing eye irritation.

Uses:

- ✓ Post-cataract surgery – Reduces pain & inflammation.
- ✓ Ocular inflammation – Treats redness, swelling, and discomfort.
- ✓ Non-steroidal alternative – Safer long-term use than corticosteroids.

Fexofenadine Hydrochloride: 30 mg per 5 ml
Fast-acting, non-sedating antihistamine.

Allerick is usually given to children to treat a wide range of symptoms caused due to allergic conditions such as hay fever, urticaria (hives), conjunctivitis (red, itchy eye), and common cold. These symptoms include watery eyes, runny nose, sneezing, and itching among others.

Uses:

- Relieves symptoms of seasonal allergic rhinitis (hay fever), including:
- Sneezing
- Runny or itchy nose
- Itchy, watery eyes
- Treats chronic urticaria (hives) — reduces itching and rash.

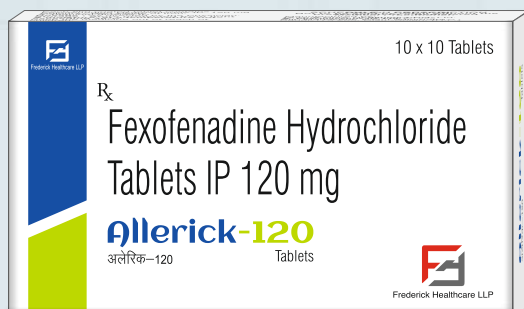

Precautions:

- Use with caution in patients with kidney issues.
- Avoid fruit juices (like grapefruit, orange, apple) as they may reduce effectiveness.
- Consult your doctor if pregnant or breastfeeding.

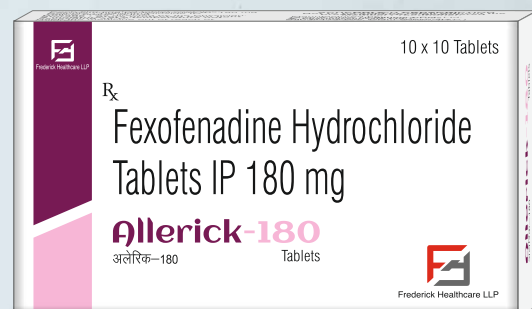

PACK: 60ML

ASTHARICK 2.5

Salbutamol Nebuliser Solution BP (2.5mg/2.5ml)

Salbutamol (as sulfate): 2.5 mg in 2.5 ml
single-dose unit
Ready-to-use solution for nebulization.

Uses:

- It provides quick relief from (COPD)
- Bronchospasm in asthma
- Acute episodes of wheezing and breathlessness
- Helps open airways and improve airflow to the lungs.

**Fast-acting Bronchodilator
for Respiratory Relief**

Precautions:

- Caution in patients with heart conditions, high blood pressure, or diabetes.
- Avoid excessive use — overuse may cause heart palpitations or tremors.
- Consult your doctor if pregnant or breastfeeding.

Side Effects:

- Tremors, headache, or dizziness
- Rare: Fast heartbeat, muscle cramps, or allergic reactions — seek medical help if severe.

BILASRICK-M

Bilastine 20mg & Montelukast Sodium 10mg

Dual-action Allergy and Asthma Relief

Bilastine: 20 mg (Non-sedating antihistamine)

Montelukast Sodium: 10 mg (Leukotriene receptor antagonist)

Uses:

- Allergic rhinitis (hay fever): Relieves sneezing, runny nose, and itchy eyes.
- Chronic urticaria (hives): Reduces itching, redness, and swelling.
- Asthma management: Prevents airway inflammation by blocking leukotrienes.
- Effective for both seasonal and perennial allergies.

Precautions:

- Avoid alcohol & sedatives – May enhance drowsiness in sensitive individuals.
- Pregnancy & Breastfeeding – Consult a doctor before use.
 - Liver & Kidney Patients, Use with caution if you have pre-existing conditions.
- Not for Acute Asthma Attacks, Montelukast is preventive, not a rescue medication.

Side Effects:

Headache, dry mouth, dizziness.

Rare: Allergic reactions — seek immediate help if symptoms worsen.

BUDERICK

0.5MG & 1MG

Inhaled Corticosteroid for Respiratory Relief

Budesonide is effective in:

- It controls inflammation and prevents asthma attacks.
- It reduces airway swelling in Chronic Obstructive Pulmonary Disease (COPD).
- Eases breathing difficulty in Croup (laryngotracheobronchitis) in children.

Precautions:

- Rinse mouth after use to prevent oral thrush.
- Use with caution in patients with tuberculosis or lung infections.
- Consult a doctor if pregnant, breastfeeding, or using long-term.

Side Effects:

- Sore throat, cough, hoarseness.
- Rare: Allergic reactions, vision changes seek medical help if severe.

Dual Action Formula for Cough & Congestion Relief!

FREDILIX

Key Ingredients & Their Benefits:

Pholcodine 1.5mg: A cough suppressant that reduces the urge to cough by acting on the brain's cough center — ideal for dry, irritating cough.

Phenylephrine Hydrochloride 2.5mg: A nasal decongestant that shrinks swollen nasal blood vessels, providing relief from blocked nose and sinus pressure.

Why Choose This Combination?

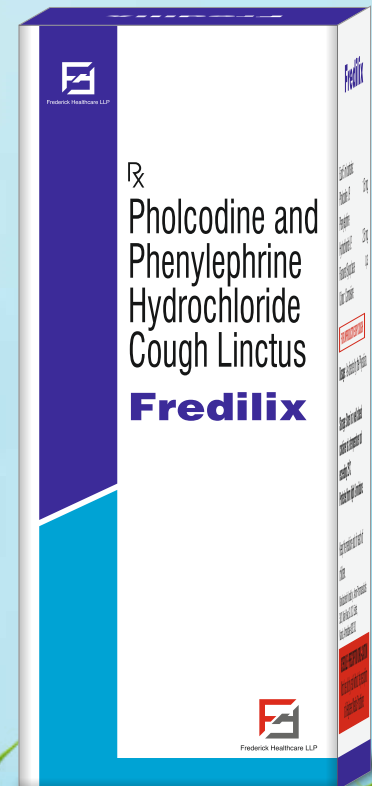

- Soothes dry, unproductive cough effectively.
- Clears nasal congestion and reduces sinus pressure.
- Fast-acting formula — starts relieving symptoms within 30 minutes.
- Non-drowsy solution — keeps you going through the day

Indications:

- Dry, tickly cough
- Nasal congestion and stuffy nose
- Sinus discomfort and pressure
- Cold and flu symptoms

PACK: 60ML
M.R.P.: 98.80/-

**"Dual Relief: Calm Your
Cough, Ease Your Allergies!"**

FREDITUSS-CPM

Dual Action Formula:

Levocloperastine Fendizoate (35.4mg) /

Levocloperastine Hydrochloride (20mg) – Cough Suppressant (Antitussive)

- ✓ Directly suppresses the cough reflex in the brain without causing drowsiness.
- ✓ Effective in treating dry, non-productive cough (cough without mucus).
- ✓ Provides long-lasting relief from persistent coughing.

Chlorpheniramine Maleate (4mg) – Antihistamine (Anti-Allergic)

- ✓ Blocks histamine receptors, reducing allergy symptoms like runny nose, sneezing, and throat irritation.
- ✓ Helps control cough caused by allergies (e.g., dust, pollen, pet dander).

Key Benefits:

- Controls dry, unproductive cough.
- Relieves allergy-related symptoms — runny nose, watery eyes, and sneezing.
- Reduces throat irritation and calms the cough reflex.
- Fast-acting formula with long-lasting relief.

Indications:

- Dry cough (non-productive cough)
- Allergic rhinitis (sneezing, runny nose, itchy throat)
- Cold and flu with allergic symptoms
- Upper respiratory tract infections

FREDITUSS Q DT

Dextromethorphan Hydrobromide 10mg,
Chlorpheniramine Maleate 2mg
& Phenylephrine Hydrochloride 5mg
Dispersible Tablets

"Feel Fresh Breath Fresh"

Key Benefits & Action:

- **Dextromethorphan Hydrobromide:**

A cough suppressant-reduces the urge to cough by acting on the brain's cough center.

- **Chlorpheniramine Maleate:**

An antihistamine-relieves sneezing, runny nose, and itchy throat caused by allergies or colds.

- **Phenylephrine Hydrochloride:**

A nasal decongestant-shrinks blood vessels in the nasal passages, reducing stuffy nose and congestion.

Precautions:

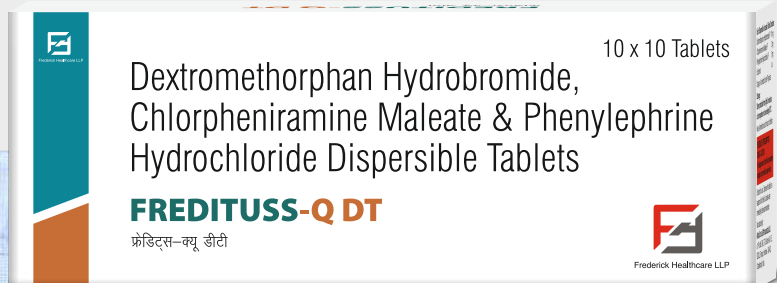

- ✓ Avoid alcohol — may increase drowsiness and dizziness.
- ✓ Use cautiously in high blood pressure, heart disease, or glaucoma.
- ✓ Not recommended for children under 6 years unless prescribed.
- ✓ Pregnant or breastfeeding? Consult your doctor before use.

Uses:

Dry and irritating cough
Common cold and flu symptoms
Allergic cough and throat irritation
Sinus congestion and nasal blockage

Side Effects:

Drowsiness or dizziness
Dry mouth or blurred vision
Nausea or stomach discomfort
Increased heart rate (rare)

FREDLINCTUS BM

Terbutaline Sulphate (2.5 mg): A bronchodilator that helps relax the muscles in the airways, making breathing easier.

Bromhexine HCl (8.0 mg): A mucolytic agent that thins and loosens mucus in the airways, aiding in its removal.

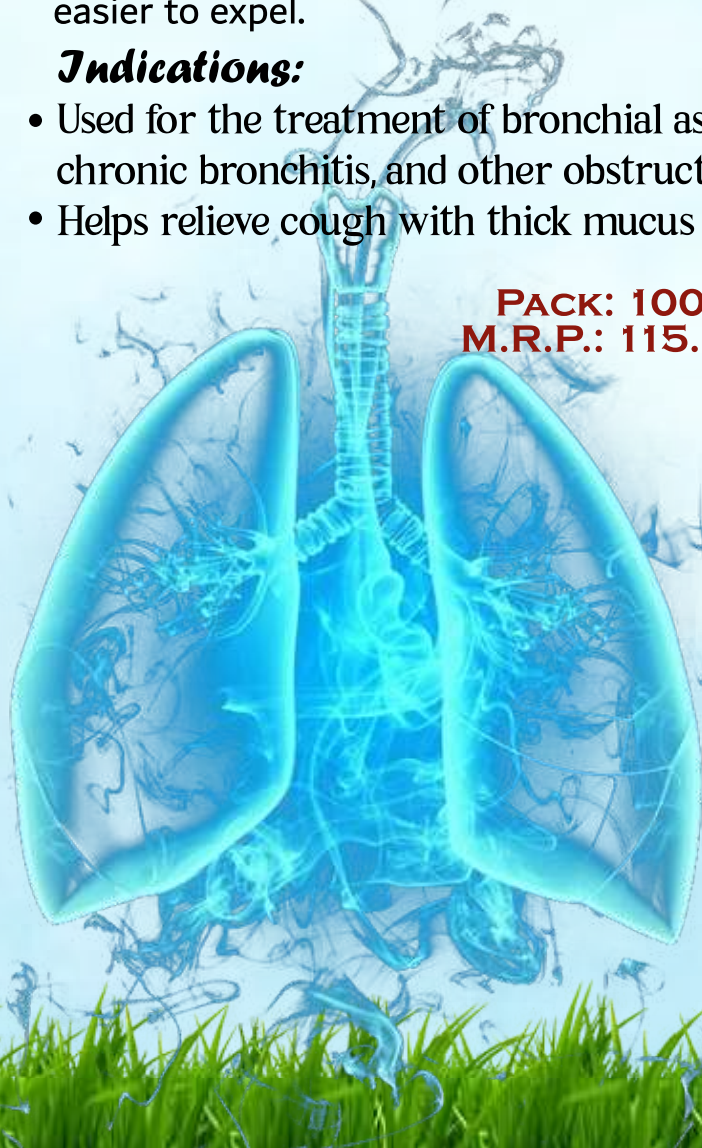

Mechanism of Action:

- **Terbutaline:** Stimulates beta-2 adrenergic receptors, relaxing airway muscles and improving airflow.
- **Bromhexine:** Breaks down mucus structure, making it less sticky and easier to expel.

Indications:

- Used for the treatment of bronchial asthma, chronic bronchitis, and other obstructive airway disorders.
- Helps relieve cough with thick mucus (productive cough).

NASORICK

NASAL SPRAY ADULT & PAEDIATRIC

Oxymetazoline Hydrochloride : A nasal decongestant that provides quick relief from nasal congestion by constricting blood vessels in the nasal passages.

Benzalkonium Chloride Solution : An antiseptic and preservative that prevents bacterial contamination in the nasal spray.

Indications:

Effective in treating:

Nasal congestion due to common cold, sinusitis, or allergies.

Blocked nose caused by hay fever or other upper respiratory tract infections.

Provides fast, long-lasting relief (up to 12 hours).

Mechanism of Action:

Oxymetazoline: Stimulates alpha-adrenergic receptors, causing blood vessels in the nasal mucosa to constrict, reducing swelling and allowing easier breathing.

Benzalkonium Chloride: Kills bacteria and ensures the solution remains sterile.

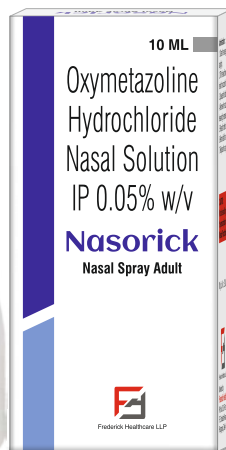

Side Effects:

- Temporary burning or stinging in the nose
- Dryness of the nasal mucosa
- Sneezing
- Rebound congestion with overuse

PACK: 10ML
M.R.P.: 99.00/-

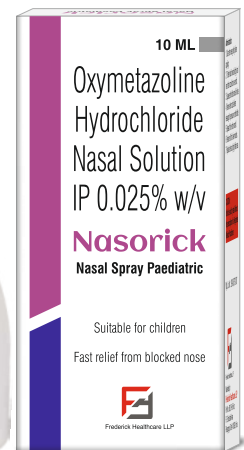

Oxymetazoline 0.05% &

NOSCARICK

Noscapine (15 mg): A non-narcotic cough suppressant (antitussive) that reduces the urge to cough by acting on the cough center in the brain.

Ammonium Chloride (28 mg): An expectorant that helps loosen mucus in the airways, making it easier to cough out.

Sodium Citrate (6.5 mg): A mucolytic agent that thins mucus, reducing its stickiness and helping clear congestion.

Mechanism of Action:

Noscapine: Suppresses the cough reflex by acting on the central nervous system.

Ammonium Chloride: Increases respiratory tract secretions, helping to clear mucus.

Sodium Citrate: Reduces mucus thickness, aiding in its expulsion.

Indications:

Used to treat:

Dry and productive cough
Common cold and flu symptoms
Bronchitis and other mild respiratory infections

Side Effects:

Drowsiness
Nausea or upset stomach
Mild throat irritation

PULMORICK

Glycopyrronium Bromide (25 mcg):

A long-acting muscarinic antagonist (LAMA) used to relax airway muscles and improve airflow in the lungs.

Mechanism of Action:

Glycopyrronium works by blocking muscarinic (M3) receptors in the airway smooth muscle, preventing bronchoconstriction and allowing the airways to stay open, easing breathing.

Provides 24-hour bronchodilation with once-daily dosing.

Indications:

Prescribed for the maintenance treatment of:
Chronic Obstructive Pulmonary Disease (COPD)
Emphysema
Chronic bronchitis

**PACK: 2ML
M.R.P.: 275.00/-**

Side Effects:

Dry mouth
Sore throat
Headache
Constipation
Rare: Difficulty urinating or blurred vision

Eicosapentaenoic Acid (EPA) 180 mg — reduces inflammation and supports heart health.

Docosahexaenoic Acid (DHA) 120 mg — vital for brain function and vision.

Methylcobalamin (1500 mcg): Bioactive Vitamin B12 — supports nerve health and red blood cell formation.

Folic Acid (400 mcg): Essential for cell growth, DNA formation, and red blood cell production.

Boron (1.5 mg): Enhances calcium metabolism, improving bone strength and reducing bone loss.

Calcium Carbonate (500 mg): Provides 200 mg of elemental calcium crucial for bone density and muscle function.

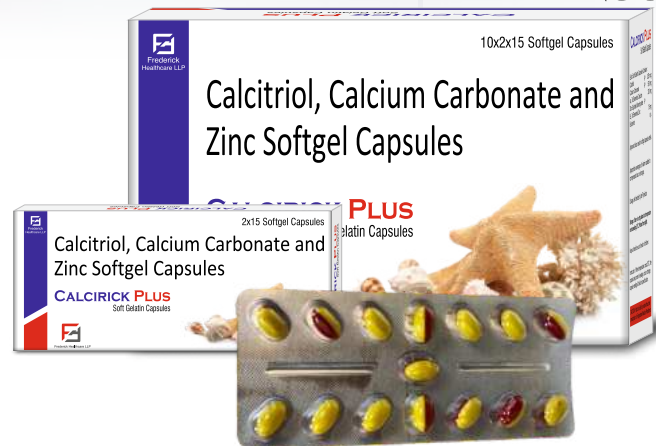

PACK: 15 CAPSULES
M.R.P.: 225.00/-

CALCIRICK PLUS

Calcitriol Ip - 0.25 Mcg
Calcium Carbonate Ip 500 Mg
Zinc Sulphate Monohydrate Ip 7.5mg

PACK: 15 CAPSULES
M.R.P.: 200.00/-

CALCIRICK-XT

Calcium (1250mg): Essential for maintaining strong bones and teeth, preventing osteoporosis.

Vitamin D3 (2000 I.U.): Enhances calcium absorption and supports bone health.

Methylcobalamin (Vitamin B12) (1500mcg): A bioactive form of B12 promotes nerve health and red blood cell formation.

L-Methyl Folate Calcium (1mg): An active form of folic acid crucial for DNA synthesis, red blood cell production, and nerve function.

Pyridoxal 5-Phosphate (Active Vitamin B6) (0.5mg): Helps regulate amino acids, supports nerve function, and boosts brain health.

PACK: 15 TABLETS
M.R.P.: 414.95/-

EVIRICK-PLUS

Vitamin E (10 mg): A powerful antioxidant that protects cells from oxidative stress, promoting skin health and immunity.

Wheat Germ Oil (100 mg): A natural source of Vitamin E, essential fatty acids, and minerals — supports skin hydration, reduces inflammation, and boosts metabolism.

Omega-3 Fatty Acid (30 mg): Contains EPA & DHA — vital for heart health, brain function, and reducing joint inflammation.

Indications:

Skin health & anti-aging — fights free radicals, reduces wrinkles, and hydrates skin.

Cardiovascular health — lowers bad cholesterol (LDL) and boosts heart function.

Joint & muscle support — reduces inflammation and supports mobility.

Immune system boost — strengthens the body's natural defenses.

Hair & nail health — promotes growth and reduces damage.

PACK: 10 CAPSULES

FERORICK

Iron: Essential for the formation of hemoglobin and red blood cells prevents and treats anemia.

Folic Acid: Vital for DNA synthesis, cell division, and preventing neural tube defects during pregnancy.

Vitamin B12 (Methylcobalamin): Supports nerve health, boosts red blood cell production, and reduces fatigue.

Minerals (Zinc, Copper, etc.): Aid in immune function, bone health, and metabolism.

Indications:

Iron Deficiency Anemia
Pregnancy & Lactation support
Post-surgery recovery
Chronic Fatigue & Weakness
Neuropathy & Nerve health

Precautions:

Use cautiously in patients with:
Iron overload disorders (Hemochromatosis)
Kidney disease
Pregnant women should follow prescribed doses strictly.

06

*"Replenish Iron,
Restore Strength!"*

FERORICK

Iron Sucrose (20 mg/ml):

A form of injectable iron used to treat iron deficiency anemia (IDA).

Mechanism of Action:

Releases iron directly into the bloodstream, where it binds to transferrin — aiding the production of hemoglobin and red blood cells.
Faster and more effective than oral iron for severe deficiency.

Indications:

Iron Deficiency Anemia (IDA):
In patients with chronic kidney disease (CKD).
For those who cannot tolerate oral iron supplements.
Post-surgery or postpartum anemia.
Pregnancy-related anemia (under medical supervision).

Side Effects:

Mild:

Nausea, headache, or dizziness.

Mild pain at the injection site.

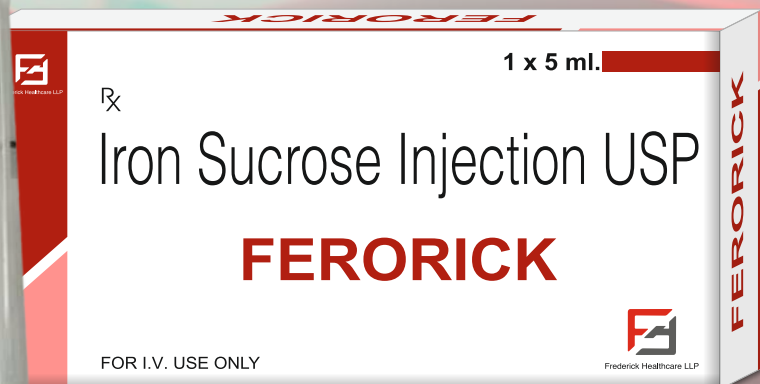

Severe (rare):

Allergic reactions (rash, swelling, difficulty breathing).

Hypotension — sudden drop in blood pressure.

PACK: 5ML
M.R.P.: 321.00/-

FERORICK-XT

Ferrous Bisglycinate (Iron)

Highly absorbable iron for boosting hemoglobin & preventing anemia.

Gentle on the stomach with minimal gastric irritation.

Zinc Bisglycinate

Supports immune function, wound healing & cell growth.

Helps in reducing fatigue and improving overall well-being.

Folic Acid (Vitamin B9)

Essential for red blood cell formation & brain health.

Prevents neural tube defects during pregnancy.

Methylcobalamin (Vitamin B12)

Supports nerve health & cognitive function.

Helps in energy production & reducing weakness.

Why Choose This Combination?

- ✓ Highly bioavailable form of iron & zinc for better absorption.
- ✓ Boosts red blood cell production and supports overall vitality.
- ✓ Enhances immunity, brain function, and nerve health.
- ✓ Ideal for individuals with anemia, pregnancy, and active lifestyles.

PACK: 15 TABLETS
M.R.P.: 210.00/-

FREDERICK HUNGRY

STRAWBERRY & KIWI

Cyproheptadine HCl (2 mg): An antihistamine used to stimulate appetite and treat allergies.

Tricholine Citrate (275 mg): A lipotropic agent that helps in liver detoxification and reduces cholesterol levels.

Key Benefits:

Appetite Stimulant: Effective in treating loss of appetite and undernutrition.

Liver Support: Aids in improving liver function and detoxifying harmful substances.

Allergy Relief: Helps manage symptoms like itching, runny nose, and sneezing.

Weight Gain: Promotes healthy weight gain in individuals with poor nutritional intake.

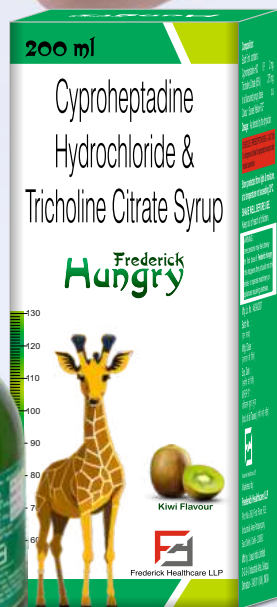

Indications:

- ◻ Anorexia (loss of appetite)
- ◻ Weight loss due to chronic illness
- ◻ Liver disorders
- ◻ Allergic conditions (e.g., urticaria, hay fever).

Precautions:

- ◆ Not suitable for children without medical advice.
- ◆ Avoid alcohol while taking this medication.
- ◆ Use cautiously in patients with liver or kidney disorders.

L-ARGININE & PROANTHOCYANIDIN

L-Arginine : A vital amino acid that boosts nitric oxide (NO) production — helping to improve blood flow and relax blood vessels.

Proanthocyanidins : Powerful antioxidants derived from plant sources — protect cells from oxidative stress and support vascular health.

Indications:

Pregnancy support: Helps in managing pregnancy-induced hypertension (PIH).

Reduces risk of intrauterine growth restriction (IUGR).

Cardiovascular health: Improves blood circulation and lowers blood pressure.

Male fertility: Enhances sperm motility and count by boosting blood flow to reproductive organs.

Antioxidant support: Protects against free radical damage and reduces inflammation.

Precautions:

Use with caution in patients with:

Kidney disorders

Low blood pressure (hypotension)

Pregnant or breastfeeding women

should use under medical supervision.

FREDERICK¹⁰ WELLNESS PLUS

This nutritional supplement is formulated to support nerve health, improve energy levels, and promote overall well-being. It is commonly used in the management of neuropathy, fatigue, and vitamin deficiencies.

Levocarnitine 500mg:

Aids in fat metabolism & energy production

Helps in muscle recovery & endurance

Methylcobalamin (Vitamin B12) 1500mcg:

Supports nerve regeneration & brain function

Helps prevent anemia & neurological disorders

Folic Acid (Vitamin B9) 1.5mg:

Essential for red blood cell formation & DNA synthesis

Supports heart health & prenatal development

Vitamin E 200mg:

A powerful antioxidant that protects cells from damage

Supports skin, hair, and immune health

Key Benefits:

Supports nerve function & reduces nerve pain

Enhances energy production & reduces fatigue

Promotes brain & heart health

Improves blood circulation & oxygen supply

Supports muscle recovery & overall vitality

Indications:

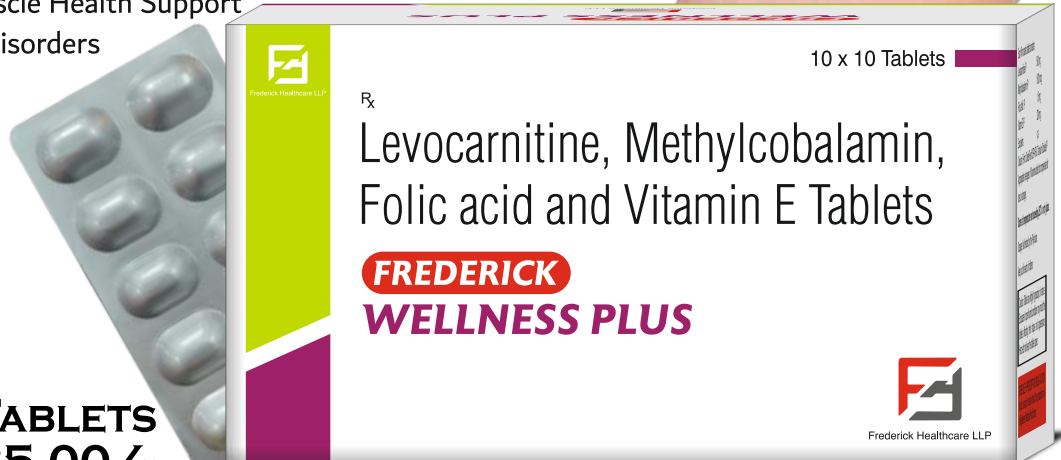

Peripheral Neuropathy (nerve damage due to diabetes or other conditions)

Vitamin B12 & Folate Deficiency

Chronic Fatigue Syndrome

Cardiovascular & Muscle Health Support

Neurodegenerative Disorders

FREDERICK-Q 10

COENZYME Q10, L-CARNITINE, LYCOPENE,
MULTIVITAMIN & MULTIMINERAL SOFTGEL CAPSULES

Coenzyme Q10 100mg

A powerful antioxidant that supports cellular energy production.

Benefits:

Enhances heart health, reduces oxidative stress, improves skin, and supports brain function.

Uses: Helps manage high blood pressure, cholesterol, and fatigue.

L-Carnitine 50mg

An amino acid derivative essential for fat metabolism and energy production.

Benefits:

Enhances athletic performance, aids in weight management, and supports heart health.

Uses: Used for fat burning, muscle recovery, and reducing muscle fatigue.

Lycopene 5.17mg

A natural carotenoid antioxidant used in nutritional deficiencies.

Benefits:

Protects against oxidative stress, supports skin health, and may reduce the risk of prostate cancer and heart disease.

Uses: Improves cardiovascular health, promotes skin protection from UV rays, and supports prostate health.

Multivitamins & Multiminerals

A blend of essential vitamins (A, B-complex, C, D, E, K) and minerals (Zinc, Magnesium, Iron, Calcium, Selenium, etc.).

Benefits:

Supports immunity, metabolism, bone health, and overall well-being.

Uses: Prevents nutritional deficiencies, boosts energy, and strengthens the immune system.

BENEFITS OF THIS FORMULA

- ✓ Heart & Cardiovascular Health
- ✓ Energy & Metabolism Boost
- ✓ Immunity & Antioxidant Protection
- ✓ Bone & Muscle Support
- ✓ Brain & Nervous System Health

FREDIORTHO

KNEE JOINT

Boswellia Serrata (250 mg):

A natural anti-inflammatory — reduces joint pain and stiffness.
Promotes cartilage protection and joint mobility.

Glucosamine (220 mg):

Supports cartilage regeneration and lubricates joints.
Slows down osteoarthritis progression.

Collagen Peptide (40 mg):

Enhances joint elasticity and strengthens connective tissues.
Promotes skin health along with joint support.

Sodium Hyaluronate (20 mg):

Boosts joint lubrication — reduces friction and pain during movement.
Helps retain moisture in tissues.

Chondroitin Sulphate (50 mg):

Works with glucosamine to repair cartilage and reduce joint inflammation.
Increases joint flexibility.

Rose Hip Extract (375 mg):

Rich in Vitamin C — powerful antioxidant that reduces joint inflammation.
Alleviates rheumatoid arthritis symptoms.

Ginseng Extract (10 mg):

Boosts energy levels and reduces fatigue.
Supports overall immune health.

Pyridoxine HCl (Vitamin B6, 1000 mcg):

Promotes nerve health and reduces joint pain caused by inflammation.

Thiamine (Vitamin B1, 1000 mcg):

Enhances muscle function and nerve repair.
Helps reduce joint stiffness.

LYCORICK

Lycopene (5%) – 1000 mcg:

Powerful antioxidant — protects cells from damage.
Promotes heart health and skin protection.

Vitamin A – 2500 IU (100% RDA):

Supports vision, immunity, and skin health.

Vitamin E – 10 IU (100% RDA):

Protects cells from oxidative stress.
Enhances skin and hair health.

Vitamin C – 50 mg (62.5% RDA):

Boosts immunity and collagen formation.
Improves wound healing.

Selenium Dioxide – 35 mcg (52.5% RDA):

Acts as an antioxidant — supports thyroid health and immune function.

Zinc Sulphate – 3 mg (5.29% RDA):

Essential for immunity, wound healing, and metabolism.

Manganese Chloride – 2 mg:

Aids bone health and collagen formation.

Potassium Iodine – 100 mcg (42.85% RDA):

Supports thyroid function and hormone regulation.

Copper Sulphate – 500 mcg:

Promotes iron absorption and immune health.

B-Vitamins for Energy:

Thiamine HCl (B1) – 2 mg (100% RDA):

Boosts energy metabolism and nerve health.

Riboflavine (B2) – 3 mg (100% RDA):

Supports energy production and cellular function.

Pyridoxine HCl (B6) – 1.5 mg (62.5% RDA):

Improves brain function and mood regulation.

This Tablets Is Available In
Sublingual

NEURORICK-OD

MECOBALAMIN 1500MCG SUBLINGUAL TABLETS

BENEFITS OF SUBLINGUAL TABLETS

1. Faster Absorption:

Sublingual tablets dissolve under the tongue and are absorbed directly into the bloodstream through the mucous membranes, bypassing the digestive system. This allows for faster onset of action compared to oral tablets.

2. Higher Bioavailability:

Because the tablet does not have to pass through the digestive tract, a greater amount of the active ingredient enters the bloodstream, resulting in higher bioavailability.

3. Reduced Risk of Stomach Irritation:

Since the medication bypasses the stomach and intestines, it can reduce the likelihood of gastrointestinal irritation, which some people experience with traditional oral medications.

4. Better for Individuals with Digestive Issues:

People with certain digestive problems, such as acid reflux or malabsorption syndromes, may find sublingual tablets more effective since they don't rely on the digestive process.

INDICATIONS:

- ✓ To prevent neurological disorder in patients with neuropathy due to diabetes
- ✓ Alcohol or other drug-induced neuropathy
- ✓ Vitamin B12 deficiencies

TENDORICK CORAL

Key Benefits:

□ Supports Joint Health & Mobility

Chondroitin Sulphate helps maintain cartilage structure and lubricates joints.
Reduces joint pain and inflammation.

□ Boosts Collagen Production

Collagen Peptide promotes cartilage regeneration and improves flexibility.
Enhances skin elasticity and bone strength.

□ Powerful Anti-inflammatory Action

Curcuma Longa (Turmeric) contains curcumin a natural anti-inflammatory
that helps relieve joint pain and stiffness.

□ Strengthens Bones & Muscles

Magnesium supports muscle function and enhances bone density.
Helps prevent cramps and muscle fatigue.

□ Improves Immunity & Healing

Vitamin C boosts collagen synthesis and strengthens immune defense.
Accelerates wound healing and reduces oxidative stress.

Multivitamins:

A, B-complex (B1, B2, B3, B5, B6, B12), C, D, E

Multiminerals:

Calcium, Magnesium, Iron, Copper, Iodine, Selenium

Zinc Gluconate Suspension:

Provides elemental zinc for enhanced absorption

Antioxidants:

Vitamin C, E, and Selenium to fight free radicals

Key Benefits:

✓ Boosts Immunity

Zinc gluconate strengthens immune response and wound healing.

Helps fight infections and common colds.

✓ Enhances Energy & Metabolism

B-complex vitamins convert food into energy.

Promotes nerve health and reduces fatigue.

✓ Strengthens Bones & Muscles

Calcium & Vitamin D support bone density and muscle function.

Magnesium prevents muscle cramps.

✓ Protects Against Oxidative Stress

Antioxidants (Vitamin C & E) neutralize free radicals slow down aging and cell damage.

✓ Improves Skin, Hair & Nail Health

Vitamin A, C & Zinc promote collagen synthesis for glowing skin.

Strengthens hair follicles and nail growth.

TRANERICK 500

Tranexamic Acid (500 mg):

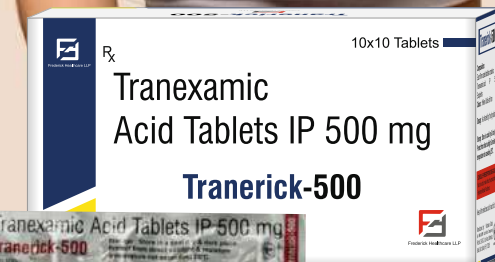

An antifibrinolytic agent that helps prevent excessive bleeding by stabilizing blood clots.

Indications:

Used to treat and prevent bleeding in conditions such as:
Heavy menstrual bleeding (menorrhagia)
Surgery-related bleeding (especially dental, orthopedic, or cardiac surgeries)
Nosebleeds (epistaxis)
Hemophilia — to control spontaneous bleeding
Postpartum hemorrhage

Mechanism of Action:

Works by inhibiting plasminogen activation, preventing the breakdown of fibrin (a protein that forms blood clots), helping to stop excessive bleeding.

Mefenamic Acid 250mg: A non-steroidal anti-inflammatory drug (NSAID) that relieves period pain (dysmenorrhea), cramps, and inflammation.
